

4 Million Btu/hr Dual Gas Condensing Boiler

Meeting today's heating needs...

preserving the environment
for future generations

 **GMI 4 M
Dual Gas**

This unit features a Dual Gas burner able to use Natural Gas or Propane as a fuel source.

A dual gas train means that switching fuels is as easy as flicking a switch.

An optional special burner controller can be incorporated eliminating the need to perform combustion calibration after switching fuels.

This unit is an excellent solution for critical needs applications and owners can benefit from the discounted utility rate, where applicable, offered for units with backup fuel capability.

Unique Features

- 316L Stainless Steel heat exchanger
- Certified as potable hot water boiler and water heater
- Dual gas train
- Linkageless modulating burner
- Modbus communication
- Automatic fuel switchover available
